

IMPORTANT NOTICE

The ACCUMulate feature has been changed from the one described in the Instruction Guide (see Page 17). The ACCUM feature is now independent from the USCF Delay.

Turning ACCUM on (using the method in the Instruction Guide) will enable the FIDE (Federation International des Echecs) bonus ACCUMulate time. When the feature is first turned On the bonus will be set to 30 seconds. After every move in Sudden time control, 30 seconds will be added to the player's turn that just moved. An "F" will be shown as a reminder the bonus time is in effect.

You may adjust the bonus to as much as 60 seconds by pressing the SELECT button once more after ACCUM is turned On. The + and - buttons will change the bonus amount.

When the ACCUM feature is now turned on, the DELAY ALL feature will become the ACCUM ALL feature. DELAY ALL is described on page 18, "Controlling when the countdown delay is used".

To restore the USCF Delay feature, the ACCUM feature must be turned OFF.
